Use-Case Name: Use-Case 2.0 Disable User Account

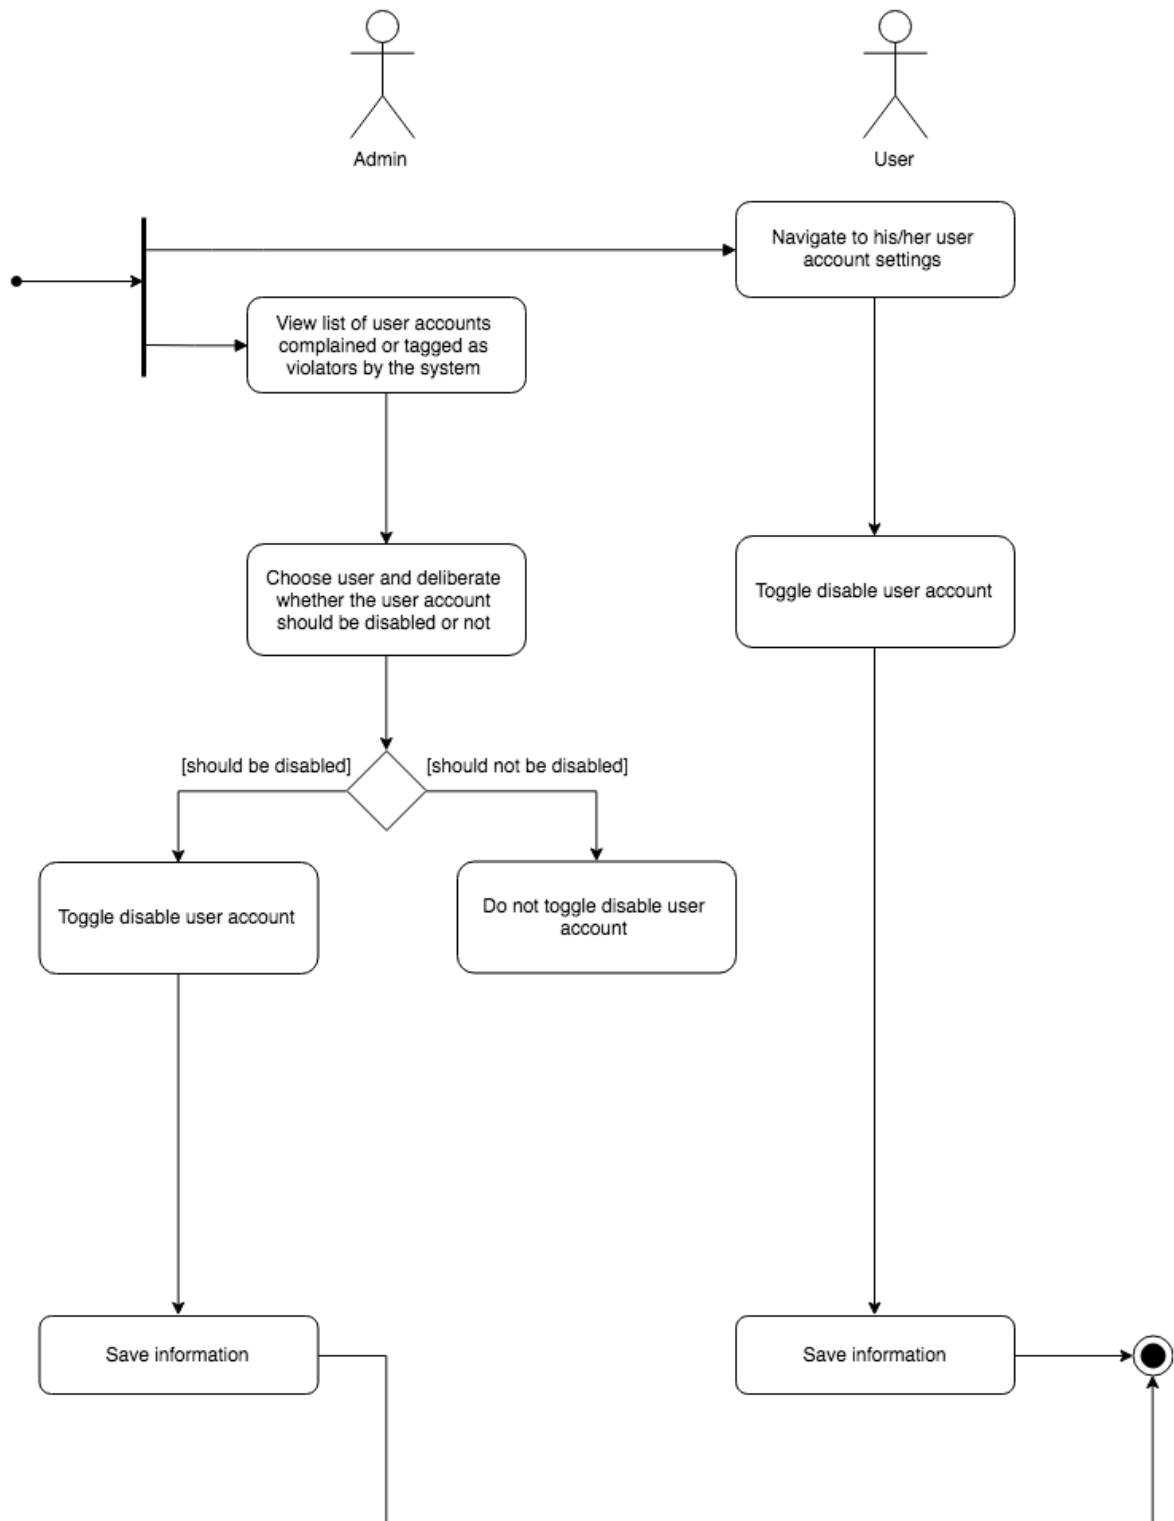

Description: Administrator can disable (with deliberation) user accounts that are complained by other users, or disable user accounts that violate the Iskolivery's terms and conditions. General user can also opt to disable their own user account.

Preconditions: For the Scenario: Administrator disables user account, the administrator must be logged into the system already.

Flow of Events:

<i>Scenario Name</i>	<i>Description</i>
Administrator disables user account	The system displays a list of user accounts complained by other users or tagged by the system as a violator of the Iskolivery's terms and conditions. The admin will review the complaints and/or violations, then deliberate whether the user account should be disabled or not. The admin can toggle the disable user account option for the user account if deemed accordingly. The admin clicks save and the system will update the information.
User disables his/her own user account	This use case begins when the user navigates to the settings of his/her account. The user can toggle the disable user account option if he or she wants to opt out of the system temporarily.

Activity Diagram of the Flow of Events:

Postcondition: NONE

Relationships: NONE

Special Requirements:
NONE
